1. Purpose

This Guidance Note seeks to articulate the purposes for which a Grade Point Average (GPA) is calculated at the Australian Institute of Higher Education Pty Ltd ('the Institute') and the principles to be employed in determining a GPA.

2. Principles

Key principles informing this Guidance Note are:

- The GPA calculation results in a number (GPA) between 0 and 7, which is rounded up to one decimal place.
- Where all units have been completed at the Institute and within the same course, all units will be included in the GPA calculation. This includes fail grades for courses that have subsequently been undertaken at a later date, and for which passing grades have been awarded.
- Where a student has received credit from an external institution (including cross-institutional study) only those units completed at the Institute will be included in the GPA calculation.
- Where a student has completed more than the maximum units, only the units within the course structure will be counted towards the GPA calculation. If a student completes more than the maximum number of elective units within the course and all units are within the course structure, the electives with the highest grade will be counted towards the maximum number of electives used to calculate the GPA.

3. Context

This Guidelines has been developed to establish a uniform process for calculation GPA's.

4. Scope

This Guideline applies to all enrolled students at the Institute and to staff involved in calculation GPA's.

5. Definitions

See the *AIH Glossary of Terms* for definitions.

6. Guidance Note Details

6.1 Purpose of the GPA

A GPA is calculated for the following reasons:

- To provide students with an indicator of their academic progress.
- To provide the Institute with an indicator to assist in determining academic merit of individual students at the Institute.
- To provide the Institute with a way of determining prize or award winners as outlined in the **Awards and Prizes Policy and Procedure**.

6.2 How is a GPA Calculated?

A grade point average (GPA) is the sum of the unit value for each course multiplied by the numerical value of the grades, divided by the sum of the unit values for all grades.

The GPA can be expressed mathematically as:

$$\text{GPA} = \frac{\sum (\text{unit value} \times \text{value of grade})}{\sum \text{unit value}}$$

6.3 Value of Grades

The following grades are included in the calculation of a GPA:

| Grade | Grade Code | Value of Grade |
|--------------------------------|------------|----------------|
| High Distinction | HD | 7 |
| Distinction | D | 6 |
| Credit | C | 5 |
| Pass | P | 4 |
| Fail | F | 0 |
| Fail – No Assessment Submitted | FNS | 0 |
| Withdrawn With Failure | WF | 0 |

The following grades are excluded from the calculation of a GPA:

| Grade | Grade Code |
|---------------------------|------------|
| Non Graded Pass | NGP |
| Grade Pending | GP |
| Supplementary Exam | SX |
| Withdrawn Without Failure | AW |
| Advanced Standing | AS |

6.4 Unit Value

The unit value will be based on the credit points for each unit. Refer to the **Course Design Policy** for further information on credit points.
